

Type A Model Schedule 【CLT(Cross Laminated Timber) · Pre-fabricated building】

【Preconditions & Notes】

- This model schedule is made on utilizing a pre – fabricated CLT for a pavilion building, and the construction period is assumed to take 12 months including exhibits work.
- The type of project delivery method is Design-Build which is an effective form of ordering for advance procurement of construction materials. Please be noted that a support by an architectural designer familiar with CLT is necessary from the basic design phase.
- The exhibits work is scheduled to be start after the completion of the building work.
- A pre – fabricated CLT may have less design flexibility.
- In case of using CLT, preorder for timbers is necessary from the basic design phase.

* This schedule is just for reference to consider the project schedule.

* In order to follow the above schedule, it is necessary to involve a licensed architects from the basic design stage, and to plan and design in compliance with Japanese laws and regulations
