Gustav Düsing / arhitekt

EUMies Awards 2024 - Architecture Winner

Gustav Düsing is an architect and researcher with a constant interest in the relationship between people and their immediate climatic situation. The goal of his research by design is to find new modes of habitation as an alternative to over-

engineered building envelopes and an increasing disconnection between indoor and outdoor spaces. Many of his projects challenge western habits of consumption and comfort while attempting to perpetuate the achievements of modernism.
